

Photos of Consuta on the Pond taken August 2013.

*Consuta on the pond moored to the model boat jetties at edge of the pond*

*Now approaching proposed museum entrance hidden behind the willow*

*The vertical marker shows the museum corner.*

*With the Funnel down there is plenty of headroom to go through to the Pond*

Consuta can negotiate the existing channel between the lake and the pond without any development work being necessary.

No fishing has been allowed on the pond because it is used for model boats.

*Now on the pond which as expected is deep*
